- Date : 3/2/26
- Prepared for : East Penn SD

Our Mission

At Flowlyst, our mission is to revolutionize business offices by enhancing operational efficiency through innovative automation solutions. We are committed to liberating valuable time for your team by streamlining and automating business office workflows. By developing adaptable data structures, we enable deeper analysis and foster data-driven decision-making, making complex tasks like forecasting and risk assessment more accessible and efficient.

Our vision is to empower leaders, including Business Managers, Chief Financial Officers, Superintendents, Operations Managers, and other Administrators with the tools they need to excel. We provide cutting-edge automation technologies that simplify processes, enhance productivity, and allow leaders to focus on strategic goals rather than routine tasks. This empowerment leads to more dynamic and effective management across organizations.

We are dedicated to building lasting relationships with our clients, whom we consider part of our extended family. Our commitment to enhancing your team's productivity is unwavering, and we strive to achieve complete satisfaction in every project. Partnering with Flowlyst means investing in a future where your organizational needs are met with precision and your operations run smoother than ever. We ensure that working with us is a decision that brings lasting benefits and success.

ABOUT US

We are a team of experts deeply committed to integrating automation within the business offices of organizations.

With over 18 years of expertise in finance and automation, our team at Flowlyst has enriched a variety of organizations, including schools, non-profits, and governmental bodies. Our deep understanding of different organizational frameworks allows us to deliver tailored financial advice and efficient automation solutions. We specialize in designing dynamic systems that enhance organizational efficiency by automating routine tasks, thus saving time and allowing your team to focus on strategic initiatives.

Our solutions are custom-built to adapt

seamlessly into your existing processes, ensuring minimal disruption and maximum efficiency. We also provide ongoing support and training to ensure that your staff can fully leverage the capabilities of our systems. By partnering with us, you leverage our expertise to streamline operations, increase productivity, and ensure compliance with financial standards, all of which are designed to empower your organization's success.

Who we are

We are a multidisciplinary team of financial consultants, software developers, and IT consultants, each equipped with the knowledge, skills, and expertise required to navigate the complexities of today's business landscape. Our passion for our work drives us, and we are committed to sharing our enthusiasm for automation with our peers and clients alike.

What we do

Utilizing the principles of object-oriented programming, we craft dynamic budget frameworks, alongside developing tools for swift projections, cash flow analyses, annual reports, and more. Our objective is to minimize the hours you dedicate to manual data entry by leveraging existing software to automate these processes for you.

Our Services

Automation consulting

Our automation services encompass a wide range of solutions including the development of structured budgeting systems, data visualization techniques, multi-year salary projection, enrollment projection, risk assessment models, financial projections, and the automation of Excel and Google Sheet worksheets for internal operations, among others. Our approach to budget automation simplifies the sharing and collaboration of spreadsheets across different departments within your organization, district, or city. This methodology not only facilitates the easy collection and contribution of data by allowing controlled access but also ensures the integrity of your meticulously crafted formulas. With a central, dynamic summary sheet, you'll witness real-time updates as various departments submit their inputs. This streamlined process is designed to significantly reduce both time and stress, empowering you with critical insights. We invite you to inquire about our past projects to see how we can tailor our expertise to your needs.

Training packages

Dive into the evolving world of technology with our **Generative AI** classes, specifically designed for educators and school administrators. As AI reshapes data management and decision-making, mastering its capabilities is essential. Our training demystifies the fundamentals of generative AI and explores its practical applications in the educational sector. From streamlining administrative operations and enhancing budget processes to automating complex reporting tasks, participants will learn to utilize AI for creating dynamic financial models, conducting predictive analytics, and developing customized communication strategies. This hands-on session is tailored to meet the unique needs of school districts, empowering your team with innovative tools to lead in a digital landscape.

Excel remains a cornerstone for data analysis across various industries. Our tailored training programs are specifically designed to meet the unique needs of your organization. Our Advanced Excel Training Class equips your team with the skills to navigate complex formulas, pivot tables, "if" scenarios, and other sophisticated Excel functionalities. What sets our training apart is the customization to your industry's context. For instance, for School Districts, our exercises focus on automating salary scales, budget adjustments, and scenario planning relevant to your specific needs. By the end of our session, our goal is to develop a practical tool that will benefit your district directly. We offer these comprehensive classes in both half-day and full-day formats, ensuring flexibility to accommodate your schedule.

Similarly, the **Google Apps for Education** platform, widely adopted across the United States and available for free to many not-for-profit organizations, offers a suite of tools designed to reduce manual labor, enhance interdepartmental communication, and foster collaboration. Our Advanced Google Sheets class delves into collaborative features, linking various sheets, utilizing the query function for data filtration, and performing calculations such as sums and averages. Additionally, we explore the integration of **Google Looker Studio**, teaching participants how to create **dynamic dashboards** that provide real-time insights and analytics. These dashboards can be customized to display key metrics and trends, aiding in data-driven decision-making. Throughout this session, we aim to create documents and dashboards that will serve as valuable resources for your organization moving forward.

Software Solutions

LOGIX – Budget planning, building & tracking software

Flowlyst's Logix is a state-of-the-art budget software, meticulously designed by a business manager with 14 years of experience in public school finance. Tailored specifically for school districts, Logix empowers each department to manage and oversee their own budget accounts, enhancing accountability and precision. As departments input their anticipated budget for the upcoming year, the business office gains immediate visibility, equipped with sophisticated analysis tools to flag inconsistencies or deviations from previous years. This ensures that all budgetary decisions are data-driven and informed. Upon completion of the budgeting process, Logix facilitates seamless integration with existing ERP systems by exporting data in CSV format, streamlining the annual budget preparation. This software not only simplifies the budget creation but also incorporates extensive experience in managing, tracking, and analyzing school budgets, ensuring a comprehensive and efficient financial management tool for school districts.

- **Departmental Autonomy:** Each department controls its budget, fostering accountability and tailored management.
- **Real-Time Oversight:** The business office can view and analyze budgets as they are being created, ensuring proactive adjustments and oversight.
- **Customizable Dashboards:** Tailored dashboards that can include requested additional data, offering deep insights and facilitating stakeholder communication.
- **Flagging System:** Automatic alerts for missing or inconsistent budget entries compared to previous years, enhancing accuracy.
- **Integration Ease:** Smooth integration with ERP systems to transfer budget data efficiently.
- **Budget Tracking:** Continuous budget tracking throughout the year, with departments accessing only the relevant data for their controlled accounts.
- **User-Friendly Interface:** Simplistic design that doesn't require financial expertise, making it accessible for all department heads.
- **Visual Analytics:** Spark lines and color-coded reports provide at-a-glance insights into financial health, improving decision-making.
- **Salary Projections:** Advanced tool for multi-year salary projections, assisting in long-term financial planning.
- **Comprehensive Reporting:** Capability to generate detailed budget reports with narratives in PDF format for easy dissemination and review.

Transportation Enrollment

Flowlyst's innovative transportation software offers a streamlined solution for student bus enrollment, significantly simplifying the process for both families and school districts. When families input their and their child's information along with their address, the software automatically calculates the distance from their home to the school. This calculation is used to determine eligibility for free transportation or if a fee is required based on the district's policy. If payment is necessary, parents can immediately settle the fee online, securing their child's bus spot. Conversely, students qualifying for free transportation are enrolled automatically.

This system not only accelerates the enrollment process but also substantially reduces the administrative burden on transportation directors by eliminating the need to manually collect payments. Schools benefit from a more efficient, error-free process that ensures all students needing bus services are registered promptly and accurately, enhancing overall operational efficiency and parent satisfaction.

AI Mastery for Education: Enhancing Efficiency with Prompt Engineering

Overview

Join Flowlyst for an essential three-hour workshop designed to empower educational staff across all levels with the transformative power of Artificial Intelligence (AI). This session focuses on the art of prompt engineering, teaching participants how to effectively communicate with AI tools to enhance operational efficiency and improve decision-making processes. Throughout the workshop, attendees will dive into practical applications of AI, learning to automate routine tasks, streamline budget management, and conduct detailed data analyses. Ideal for everyone from teachers to district administrators, the training provides hands-on experience with AI to innovate and optimize educational workflows.

- **Understanding AI:** Introduction to AI and its relevance in educational administration.
- **Overview of AI Tools:** Explore AI tools that enhance day-to-day operations, focusing on their use in automating tasks, improving communications, and facilitating decision-making in educational environments.
- **Practical Applications of AI:** Explore how AI can be leveraged to enhance various administrative functions, such as simplifying complex processes, automating repetitive tasks, and facilitating document revisions, and more. This discussion will demonstrate the broad capabilities of AI tools in transforming school business operations to achieve greater efficiency and accuracy.
- **Prompt Engineering:** Learn the art of creating effective AI prompts. From crafting simple questions to complex requests, master how to communicate with AI to get the best results.
- **Hands-On Demos:** Witness live demonstrations where we will showcase the practical applications of the skills covered in the workshop. These demos will illustrate how AI can be effectively utilized in real-world educational settings, providing you with a clear understanding of how to apply these tools and techniques in your daily operations.
- **AI in Action:** Examples include automating report narratives, summarizing meeting notes, policy revisions, excel formulas, writing code with no code knowledge, optimizing budget processes with AI-driven tools, and many more.

Why This Training?

- **Immediate Application:** Gain actionable skills that you can immediately apply in your role to see tangible results.
- **Expert Guidance:** Benefit from instruction by seasoned experts with extensive experience in financial management and AI applications in education.
- **Enhanced Productivity:** By integrating AI tools into your operations, reduce the time spent on routine tasks and focus more on strategic decision-making.

Project Proposal

#	Description	Qty	Price
1	AI is a Leadership Multiplier – full-day workshop Practical demos & prompt engineering you can use today	1	\$11,500
Initial Deposit			\$3,500
Total project cost			\$11,500

* The proposal includes all travel expenses.
